# Unique Switch Panels

Everyone can be a designer

Can freely mix and match colors and design your own images
Creating an artistic panel , reflects your personal style

• There are multiple switches to choose

1-way	2-way	4-way	1-way dimming

• Can customize colors, patterns, text, or provide your own designed images for
  free printing services.

• The proximity touch design and sensing function will activate the backlight
  when your hand is about 10 cm away from the panel.

• The dual-color light display indication, the key will turn orange when
  pressed, and it will revert to white after 10 seconds.

• Easy installation, simply replace the existing light switch with a CG panel of
  the same circuit.

• Please note: a neutral wire must be installed to power the panel.

• On-site assessment and installation services are available (limited to HongKong).
  Fees will be based on the area and installation conditions.
